

User Guide: Lead Farmer

This guide explains how to use the platform as a **Lead Farmer**: you have all **Farmer** features plus the ability to **approve or reject** other farmers' produce listings so they can go live on the marketplace. As a lead farmer, you may also be assigned to **multiple villages** by staff, allowing you to oversee farmers across a wider area.

1. Logging in

- 1. Open the platform in your browser and go to **Login**.
- 2. Enter your **phone** (or email) and **password**. Use the **eye icon** next to the password field to show or hide your password as you type.
- 3. Click **Sign in**. You are taken to **My Orders**; the sidebar shows the same items as a farmer, plus **Approvals**.

Note: Registration is currently disabled ("Coming Soon"). Your account is created by a staff admin from the **Users** page.

2. Main menu and navigation

After login, the sidebar shows:

Menu item	Purpose
Buyer Requests	View buyer demand (RFQs and sourcing requests) and respond with offers
Inputs	Browse and order farm inputs
My Produce	Post and manage your own produce listings
Pickup Schedules	Book and view pickup slots at aggregation centres
Orders	Manage orders from buyers on your listings
Analytics	View your sales and activity

Menu item	Purpose
Approvals	Lead-farmer only: Review and approve/reject other farmers' listings

Use the **menu icon** on small screens to open or close the sidebar.

In the header, you have two separate buttons: **Settings** (opens your profile page) and **Sign Out** (with a confirmation dialog before signing out).

All farmer flows (posting produce, orders, pickups, inputs, analytics, buyer requests) work the same as in the [Farmer guide](#); below we focus on **Approvals**.

3. Approving or rejecting listings (Approvals)

Essence: As a lead farmer you **quality-check** other farmers' produce listings before they go live. By approving only listings that meet variety, grade, location, and readiness details, you keep the marketplace reliable for buyers and help farmers present their produce correctly. Rejecting with a clear reason guides farmers to fix and resubmit.

Flow: Farmer posts listing (Pending lead approval) → You review in Approvals → Approve (**ACTIVE**) or Reject (Revision requested).

1. Go to **Approvals** in the sidebar.
2. You see a list of **pending** produce listings (status: **Pending lead approval**) from other farmers. If the list is empty, no listings are waiting for your review.
3. Optional: use **filters** (e.g. county, ward, aggregation centre) if the page supports them to focus on your area.
4. Click a listing to open it and review:
 - **Variety** (e.g. Kenya, SPK004, Kabode)
 - **Quantity** and unit (kg)
 - **Quality grade** (A, B, or C)
 - **Expected ready date** (when produce will be at aggregation centre)
 - **Location:** county, sub-county, ward, village
 - Optional: price per kg, aggregation centre, images
5. Decide:
 - **Approve:** Click **Approve**. The listing becomes **ACTIVE** and appears on the buyer marketplace. Buyers can place orders (including advance orders if the ready date is in the future). The listing disappears from your pending list and the farmer is notified.

- **Reject:** Click **Reject** and enter a **reason** (e.g. "Grade does not match description", "Expected date too vague"). The listing goes to **Revision requested**. The farmer is notified and can edit and resubmit. The listing disappears from your pending list.

6. After you approve or reject, you can move to the next pending listing or leave the page.

You cannot approve or reject your **own** listings; they appear in the queue for another lead farmer or staff to review.

4. Your own listings and orders (as a farmer)

Essence: Your own **My Produce** and **Orders** work like any farmer's: you post listings (which another lead farmer or staff approves), accept or reject buyer orders, and use Pickup Schedules. Lead farmer is an extra responsibility on top of being a farmer.

1. Your **own** listings: when you post from **My Produce**, they are created with status **Pending lead approval** and appear in the **Approvals** queue for **another** lead farmer (or staff) to approve. You do not see your own listings in your Approvals list.
2. **Orders:** go to **Orders** in the sidebar to see and manage orders placed on **your** listings. Accept or reject, track payment, and follow through to collection or delivery exactly as in the Farmer guide.
3. **Buyer Requests:** respond to RFQs and sourcing requests from buyers — see the [Farmer guide](#) (section 6).
4. **Pickup Schedules, Inputs, Analytics:** use these exactly as described in the [User Guide: Farmer](#).

5. Notifications and profile

- **Notifications** (bell icon) can alert you when new listings are **pending approval**, or when your own listings are approved or revision-requested. Open a notification to go to the relevant screen.
- Click **Settings** in the header to open your **Profile** page, where you can update personal details, change your phone or email (with OTP verification), update payment details, or change your password.
- Click **Sign Out** in the header to log out. A **confirmation dialog** will ask you to confirm before signing out.

6. Quick reference: key flows

Goal	Steps
Review pending listings	Approvals → Open listing → Review details → Approve or Reject (with reason)
Post your own produce	My Produce → Post produce → Fill details → Submit → Wait for another lead farmer/staff to approve
Handle orders on your listings	Orders → Open order → Accept or Reject → Fulfil when ready (same as farmer)
Respond to buyer demand	Buyer Requests → Browse RFQs/Sourcing → Submit Quote or Offer
Book pickup / buy inputs / view analytics	Follow User Guide: Farmer
Update profile	Settings → Edit personal info, phone/email (with OTP), payment details
